Technical drawing of a 1000 series ball bearing. The drawing shows the bearing from two perspectives: a side view and a front view. Dimensions are given in millimeters (mm) and inches (in). The outer diameter is 12 mm (0.4724 in). The inner diameter is 6 mm (0.2362 in). The width is 5 mm (0.1969 in). The drawing also shows the standard ISO tolerance classes: P0, P6, P5, P4, P2, and P1.

As the tire rolls, the air inside the tubeless tire is constantly being pumped in and out of the tire by the air in the tube. This is why a tubeless tire is more comfortable to ride on than a tube tire.
